

Name _____

PREWORK TEST (Total Possible 50 points)

I. Prework reading (Possible 32 points)

1. The main difference between Incident Intelligence and Incident Information is (2 points):

Incident Intelligence is used for _____.

Incident Information is used to _____.

2. What are three important reasons why Intelligence is important? (3 points)

-
-
-

3. There are generally only two causes of wildland fire incidents used in the Intelligence arena. What are they? (2 points)

-
-

4. The Incident Command System is not a cost effective and efficient way to manage incidents. (1 point)

True or False

5. The Incident Command System can be applied to a wide variety of emergency and non-emergency situations. (1 point)

True or False

6. What are the five major management activities around which the ICS organization is built? (5 points)

-
-
-
-
-

Intelligence Support Specialist (INTS)

7. Within the Planning Section of an Incident Management Team, what are the two primary units an INTS is likely to contact for additional information? (2 points)

-
-

8. When compared with a Type 2 incident, a Type 5 incident will have fewer resources, be of shorter duration, and have fewer complicating factors. (1 point)

True or False

9. What are the five main categories of resources? (5 points)

-
-
-
-
-

10. A Type 1 Crew would have a higher capability (training and/or performance) than a Type 2 Crew. (1 point)

True or False

11. What are the four major fuel groups? (4 points)

-
-
-
-

12. What are the two types of fuels that make up measurements for live fuel? (2 points)

-
-

13. In a discussion with a local FMO, she states that the 10-hr fuel moisture has dropped from 15% to 8% over the past 4-day period. Does this mean that fire spread potential will increase or decrease? (2 points)

14. Which one of the following will respond less quickly to moisture (i.e. precipitation)? (1 point)

- 1000-hour fuels
- 10-hour fuels
- 1-hour fuels

15. The calculations used in the Fire Behavior Prediction System (FBPS) are based on how many fuel models? (1 point)

-

II. National Mob Guide – Chapter 60 Predictive Services (Possible 18 points)

1. The National Interagency Coordination Center classifies large fires as _____ or larger in timber and slash fuel types, _____ or larger in grass or brush fuel types, or when a _____ or _____ is assigned. (4 points)
2. Wildland fires within a _____ should be aggregated and included on one ICS-209. (1 point)
3. For non-fire incidents, an ICS-209 will be submitted in which a _____ of wildland fire resources has occurred or when a _____ or _____ has been assigned. (3 points)
4. Define the following (10 points):
 - a. Significant commitment of national resources
 - b. Point or Zone Protection Suppression Strategy
 - c. Monitor Suppression Strategy
 - d. Full Suppression Strategy
 - e. Confine Suppression Strategy
