

The 'filters' on the Schedule page now match the filters on the Calendar page. This should make it much easier for you and others to display the Sessions for the selected area, with or without any Zone sessions. Try it! You'll like it!

We also added a 'hover to preview first page' for PDF rosters on the **Schedule** page.

On the **Session Details** page, users can now 'click' on the icon to download Rosters and Pre-work. The 'download' icon still works too. Just makes it a little easier for everyone.

There is now a '**Subscribe**' feature on the **Session Details** page.

Students who are 'subscribed' to a Session will receive an email when the Session is modified, pre-work is uploaded, rosters updated, etc.

Students are automatically unsubscribed a week after the Session ends...or they may manually unsubscribe at any time.

It's an easy way for students to stay informed!
